

Spectral Magnitude of ΔW Across Precision Modes (mean over all 28 layers, all component types)

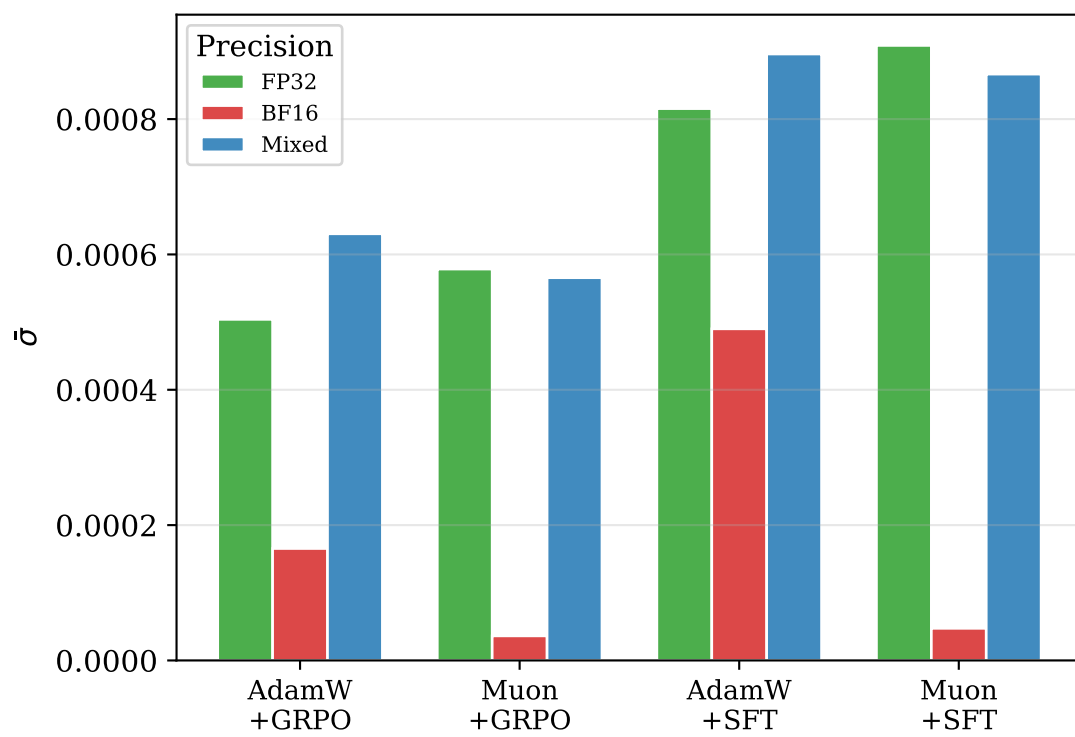

Frobenius Energy: $\|\Delta W\|_F^2 = \sum_i \sigma_i^2$

Nuclear Norm: $\|\Delta W\|_* = \sum_i \sigma_i$

Mean Singular Value: $\bar{\sigma}(\Delta W)$

Median Singular Value: $\text{median } \sigma_i(\Delta W)$
